lightWheels Teacher's Guide

Time: 1 hour

Teaches physics concepts of force, speed, and mass. For Ages 8-12.

Steps

1 Weigh in

Take your littleBits car and weigh it on the scale. Note the weight in kilo-grams.

View project
lightWheels

2 Length

Note the length of the ramp in meters

3 Roll it!

Place the ramp flat on the floor. Time how long it takes the car to go across the ramp.

Light Mixing

Time: 1 hour

This lesson plan will give students an opportunity to explore how light mixes together.

Steps

1 Take out your littleBits

Take out the following parts from your littleBits starter kit: battery, battery connector, blue power bit, green RGB led bit.

2 Snap them together!

Put the bits together in the same order as above, so they your completed circuit looks something like the picture
